

Podengo Tip Sheet:

GENERAL APPEARANCE Well proportioned muscled, sound with moderate bone. Elongated Wedge shaped head with prick ears. The Podengo is a hunting dog, scars from honorable wounds shall not be considered a fault.

SIZE & SUBSTANCE The Grande and Medio are almost square. Prosternum to point of buttocks is approximately 10% longer than the height at the withers. Strong in build, heavier bone present in larger size dogs.

GRANDE: 22" to 28" at the withers, 44 to 66 lbs

MEDIO: 16" to 22" at the withers, 35 to 44 lbs

- Smooth coat which is short and very dense.
- Wire coat which is rough and harsh w/a distinct beard.
- The coat is to be shown in a natural state
- Chest to Elbow
- Highly Mobile Ears
- May be WARY

3 DQ's - Hanging, folded ears; Over 28" under 16"; tail curled in circle touching (laying) on back.

Keep in mind there is a very small gene pool of registered dogs (world wide) that we are working with. We appreciate your consideration as we work to restore and reinvigorate this breed.

Updates, photos, breed presentations are always available for download at the club website – we encourage you to visit us there.
